

## Comparison of Four Ontario Biology Departments

This 2016 survey of 4 Biology departments in Ontario was triggered by budget justification exercises in the face of institutional changes in the budget allocation process, such as Activity Based Budgeting. Each colour consistently represents one University.

We offer these data to the CCUBC community to better inform our colleagues of the range of “normal” department size in the province with the lowest provincial grant per student in Canada. We hope that it may be useful in your internal planning process.
